

# Pandemic Sustainability Task Force Meeting

## July 22, 2020

Attending: Alisa Roman, Whitney Thorton, Dottie Janotta, Tina Fabian, Wendy Collins, Mary Emerson (minutes scribe)

Meeting mission was to establish a statement from MSNA on pausing composting and other sustainability efforts due to Covid 19. Another goal was to formulate a template for future statements from MSNA.

Utilizing a google document we collectively devised a written statement in paragraph form we could use as a press release. Additional talking points were developed in bulleted format. Alisa will place the document on MSNA letterhead and she will send out to others not present including stakeholders who expressed interest in a written statement for educating the public. Alisa requests feedback by Friday so we will have a statement for MSNA members to use in their districts by next week.

Alisa also discussed board transitioning. She has contacted Warren Deshields, Northeast Regional Director, who agreed to emcee the installation of officers virtually. Alisa will establish a date and time for the zoom membership meeting including the board transition and voting on ballot. Mary will publicize the meeting with the membership once a date is confirmed.
